

CosmicFrame

"CosmicFrame" was created to help people connect with their special moments. Every important date, whether it's a birthday, anniversary, or personal achievement, is filled with memories and emotions. By capturing how the sky looked on those days, we offer a unique way to relive those memories and remind ourselves that the universe celebrated with us. Each astronomical image serves as a beautiful reminder of how our lives align in unexpected and wonderful ways.

Graphic Inspiration

Our graphic inspiration for CosmicFrame is rooted in the beauty of the galaxy and the cosmos. We envision a design that reflects the vastness of the universe, incorporating images of the night sky that evoke a sense of wonder and exploration. The color palette will feature rounded and organic elements, with gradients of deep blues and purples inspired by the stunning hues of sunset skies.

Soft, flowing shapes will mimic celestial bodies, creating a harmonious and inviting atmosphere. This design approach not only enhances the cosmic theme but also fosters a connection between the user and the extraordinary beauty of the universe, inviting them to embark on their own celestial journey through time.
